Subject: Sedgwick South Platte River Potential Depletion - USFWS and SPWRAP

Attachments: DRAFT SPWRAP Assessment Calculation.pdf

Flag Status: Flagged

Heather and Kim,

In response to the Environmental Assessment that we submitted in October, Colorado Department of Public Health and Environment noted that coordination with the South Platte Water Related Activities Program (SPWRAP), and its associated program, Platte River Recovery Implementation Program, is required. I reached out to SPWRAP, and I was informed that to construct a new licensed wastewater treatment facility that is valid in the eyes of the State and Federal government, we will need to consult with US Fish and Wildlife Service (USFWS) on depletions to the South Platte River caused by the Town's existing drinking water wells. This will most likely require the Town to pay a small additional annual membership fee to SPWRAP, along with a larger initial fee to join SPWRAP, so I wanted to consult with the Town and confirm the path forward before I proceed further.

Platte River Recovery Implementation Program, administered by SPWRAP, was established in 2007 to protect endangered species in the Nebraska segments of the South Platte River. As I understand it, this program is essentially a way to satisfy requirements for endangered species protection established by USFWS. USFWS requires any water drawn from the South Platte River basin to be "replaced" to ensure downstream conditions do not become too dry for endangered species in Nebraska.

Apparently, all communities that have been required to adhere to this water replacement have joined SPWRAP, as SPWRAP has an agreement with USFWS to replace water drawn by all its member communities. In exchange, SPWRAP assesses an annual fee to all its member communities. The annual fee assessed to each member community is proportional to the total amount of water treated by the community for distribution to customers. Using rate information supplied to us by SPWRAP, it is estimated the annual fee assessed to the Town for 2023 would be approximately \$166. However, to become a member, SPWRAP requires new members to pay retroactive assessment fees going back to the start of the program in 2007, plus interest, which would mean the Town would have to pay approximately \$2,700 initially, including the 2023 payment of \$166, to join (see the attached SPWRAP assessment calculation). I spoke with Rich Belt, the Executive Director at SPWRAP, because I thought it was somewhat ridiculous that the Town would have to pay another sizeable fee for water replacement, as the Town is already likely required to pay an increased fee for augmentation to Sedgwick County Well Users. He says water replacement and the associated fees are still required, because fees paid to the Sedgwick County Well Users are for an intrastate agreement, while fees paid to SPWRAP would be for an interstate agreement.

Rich with SPWRAP said there is a possibility that the Town could negotiate directly with USFWS on a replacement scenario without joining SPWRAP. However, he says no community on the South Platte River basin has ever negotiated directly with USFWS for this, and he estimated it could take approximately three years to finalize this agreement directly with USFWS (which would conflict with the WWTF Improvements Project timeline). Rich could get us a USFWS to reach out to with questions if the Town wishes to reach out directly to USFWS. Either way, Rich with SPWRAP asked if someone at the Town would be interested in speaking with him directly. I can pass on his information if you would like to do so.
